PROFESSIONAL SUMMARY

I am Nash Bruce Quiros, a third-year Computer Science student passionate about artificial intelligence, software engineering, game development, and modern technologies. I specialize in C# and Dart, with experience in web development, mobile application development, and game development. My interests include AI innovation, software architecture, backend systems, and creating digital experiences that solve real-world problems. I continuously explore new technologies and improve my skills in programming, problem-solving, and system design.

EDUCATION

Bachelor of Science in Computer Science

2024 — Present

Computer Science Student & Software Developer — Tangub City, Philippines

Developing software solutions, mobile applications, websites, and games while pursuing a Bachelor of Science in Computer Science.

TECHNICAL SKILLS

Programming Languages

C# (Advanced)

Dart (Specialty)

Flutter

Unity

PHP

MySQL

Firebase

Java

C++

REST APIs

Problem-solving and algorithms

Frameworks & Tools

Flutter

Unity

Firebase

MySQL

GitHub

XAMPP

Git

Visual Studio Code

Android Studio

Xcode

Postman

Databases

MySQL

SQLite

Firebase Firestore

Areas of Expertise

Artificial Intelligence and Innovation

Mobile Application Development

Game Development

Web Development

Backend Systems and APIs

Database Management

Software Architecture

UI/UX Design

SELECTED PROJECTS

Erika's Island Experience

Game Development · Unity · C#

A 2D top-down survival and adventure game developed using Unity and C#. The game features island exploration, resource collection, and an interactive environment designed to provide an immersive gameplay experience.

- Tile-based world with real-time resource collection
- Player controller built on a custom C# state machine
- Save/load persistence and inventory system

SeekRet

Mobile Application · Flutter · Firebase

A mobile application for lost-and-found management with interactive maps, secure authentication, and social media-inspired features.

- ▶ Interactive maps with geotagged lost-and-found reports
- ▶ Secure Firebase authentication and real-time database
- ▶ Community feed with item status tracking

IOU: Debt Tracker System

Mobile Application · Flutter · SQLite

A personal finance and debt management application built with Flutter and SQLite for tracking debts and payments.

- ▶ Local-first SQLite storage — private and offline
- ▶ Partial payments and running balance tracking
- ▶ Dashboard with overdue reminders

BoardShare

Mobile Application · Flutter · SQLite

A boarding house management system for handling rooms, tenants, billing, and payments — replacing paper records with a simple digital workflow.

- ▶ Room and tenant registry with occupancy tracking
- ▶ Monthly billing with payment settlement
- ▶ Simple, non-technical user interface

Codara

Game Development · Python · Flutter

An interactive coding game that teaches programming through challenges, puzzles, and game-like levels designed for beginners.

- ▶ Level-based progression with instant feedback
- ▶ Python challenge engine + Flutter UI
- ▶ Designed for absolute beginners
